**The happier and successful children and young people can finish school,
the more relaxed is life at home!**

Does any of these questions ever cross your mind:

- Which school is good for my child? (International School, Public or Private School?)
- My child should be better supported. What needs to be done?
- Which educational options are there in the German school, university, and vocational training system?
- We are returning to Germany from abroad. Which school or type of school is appropriate for our child?
- A long-term residency in the US is imminent. What should we be prepared for?

Lifetime is precious – a sensible decision early on pays off in the future.

You want the best available educational support for your child.

I support your family in making decisions regarding the school career

- before the first day of school
- when changing schools
- before choosing a major at the university
- when searching professional options.

**My support contributes to thinking carefully about important aspects
and to making decisions calmly.**

Principles of my Work

I support children, adolescents and their parents, individual schools and school projects and I aim to conciliate personal situations with the conditions at the facilities.

Together with you and your child I develop solutions that promote individual strength and utilize available educational resources.

I provide impulses to “think differently,” regarding the organization of the school career, the kinds and types of education, and the concept school itself.

Working Fields

Pedagogical quality of the classes + Co-operation of school and home + Integration of migrants + Configuration of transition school-occupation and school-university + Professional and life planning as a task for schools

Qualifications

Residing in the USA for multiple years has allowed me to gain personal insights in the American school system which enables me to assist you in finding the school that is right for your child.

As an experienced teacher and long-time consultant of teachers of schools in many federal states of Germany and as a mother, I know both the hurdles and the opportunities of the German school system. If you are moving or returning to Germany or The US, I can advice you on how to pick the appropriate school for your child.
